

Perkins. 4/1659.

A New Almanack  
AND  
PROGNOSTICATION

for the year of our  
Lord God  
1659.

Being the third after Bis-  
sextile or Leap-year, And  
from the Worlds Creation  
5623.

Composed, and chiefly referred  
to the famous City of London.

---

Made and set forth by F. Perkins Wel-  
willer to the Mathematicks.

---

LONDON,

Printed by R.I. for the Company of  
STATIONERS. 1659.

The common Notes and moveable Feasts  
according to the English Account, for  
this year, 1659.

The Golden Number	7
The Dominical Letter	23
Shrove Sunday	13 Febr.
Easter day	3 April
Rogation Sunday	8 May
Ascension day	12 May
Whitsunday	22 May.

Note, that the Roman account is alwayes ten daies before the English Account, so that their eleventh day is our first day, and our last day is their tenth day.

The Exchequer openeth eight daies before any Term begins, except the Term of Trinity, before which it openeth but four daies.

Observe that the first and last daies of every Term, are the first and last daies of Appearance.

**A Perfect Table of the four Terms and  
their Returns, with the Effoyn days, days of  
Exception, Returna brevium, and days of  
Appearance this year, 1659.**

Hillary Term begins January 24. ends February 12

Return dayes, or dayes of Effoyn,	Dayes of exception	Returna Brevium	Dayes of Appearance

A Defence of the  
Perkins 1659  
and his of Wiltshire.

A  
Dedication

**Prognostication for the  
year of our Lord God,**

1659.

**Bring the third after Bissextile  
or Leap-year, and from the Worlds**

Creation, 5622.

**Wherein is contained the description of  
the four quarters of the year: As also a  
Chronological Table of many things worth  
remembrance, since the Creation, until this  
present year, 1659. Collected for the most  
part out of Ecclesiastical History, and other  
good Authors, something augmented.**

How necessary it is, that we should be  
instructed in the knowledge of our  
own History, and the History of the  
World, and the History of the Church.

A 10

**By F. Perkins, Well-willer  
to the Mathematics.**

**Printed at London by Robert White for the Com-  
pany of Stationers, 1659.**

A Description of the four Quarters of the year,  
and first of Winter.

O in  $\gamma$   $\pi$   $\kappa$ .

**A**cording to the custom of Writers in this kind, **Win-**  
**ter Quarter** is the first Quarter, which took beginning  
the 11. day of December, 1658. at which time the Sun en-  
tered into the first degree of the cold and dry sign Capricorn,  
being the most remote from us in his farthest South decli-  
nation, causing the dayes with us to be shortest, and the  
nights longest: which Quarter continuing until the Sun  
hath slowly passed through Capricorn, Aquarius, and Pisces.  
This Quarter doth naturally resemble Old age.

Of the Spring.

O in  $\gamma$   $\delta$   $\eta$ .

**T**his Quarter doth take beginning the 10 of March, at  
which time the Sun entred into the first minute of  
Aries, and doth continue whilst the Sun is a passing  
through these 3 vernal signs, Aries, Taurus, and Gemini. This  
Quarter doth resemble growing youth.

Of Summer.

O in  $\delta$   $\alpha$   $\eta$ .

**T**he Summer Quarter doth take his beginning when  
the Sun doth enter into the first degree of Cancer,  
which will be this year the 11 of June, and doth con-  
tinue whilst the Sun passeth through Cancer, Leo, Virgo:  
now are the dayes longest, and the ayre hottest; therefore,  
but for necessity, bid Physick Adieu.

Of Autumn.

O in  $\delta$   $\mu$   $\eta$ .

**A**utumn, or Harvest Quarter (commonly called the  
Fall of the Leaf, or some the latter Sopping) doth be-  
gin when the Sun doth enter into the first degree of Libra,  
making againe the day and the night of equal length:  
which will be this year, the 13 of September, and doth  
continue whilst the Sun doth pass through Libra, Scorpio,  
and Sagittarius. This Quarter doth like resemble declining  
age, and Phlegmatick complexion.

A brief Chronological Description  
of many things worthy of memory that have  
happened since the Creation unto this present  
year of our Lord 1659. with the year of  
the World in which they happened in.  
the first Column, faithfully col-  
lected from many good Authors.

dayes, dissolved by his  
Highness, April 20.

A great victory against the  
Hollanders, June 23.

The Lord Protector began  
his Government, Decemb.  
the 16.

Gerard and Portugals bro-  
ther beheaded on Tower-  
hill.

The Parliament called by the  
Lord Protectors Writ,  
Sept. 3.

Dunkirk delivered to the  
English, July 15.

Sir Henry Slingsby and Dr.  
Huis beheaded, June 8.

There is lately Extant, An Excellent Medici-  
nal Dispensatory, with a Physical Dictionary,  
containing the whole Body of Physick composed  
by the learned *Rennetius*, chief Physician to the  
Monarch of France, Englished by R. Tomlinson of  
London Apothecary. Also, The Carpenters Rule  
made easie, Or, The Art of Measuring superficies  
and solids, in Timber, Stone, Board, Glass, &c.  
A Book of excellent use for Carpenters, Joiners,  
Masons, Glasiers, Painters, Sawyers, &c. By  
John Darling. To be sold by George Sawbridge at  
the Bible on Ludgate-hill.

OF

## A Prognostication.

There will be four Ecclipses this year. 1659.

The first of the Moon, April 16. The beginning at 6. hours 30. min. The End at 9. and 34. min.  
The second of the Sun.

The second of the Sun, May 10. not visible to us.

The third of the Moon, *Of the* 20. The beginning at 1. hour, 42. min. The end at 4. and 37. min.

The fourth of the Sun, November 4. The beginning at 1. hour, 50. min. The End at 4. and 11. min.

**Excellent Notes of Husbandry and Gardening  
for each Moneth in the Year.**

## January Observations.

[illegible]

## February Observations.

From all sorts of beasts, and other wild, low animals, that call up others; its  
plant him, here, elsewhere; and any fruit that grows upon bushes, trees, and from  
all sorts of fruit-trees made, cankers, and all (perhaps) flowers, put in the  
water and the earth, then enclosed in cold dry heat, and the use of cold, to prevent  
mouldiness.

### March Observations.

[illegible]

## April Observations

Dear Sirs, I am glad to hear that you are all well and happy. I am  
well and hope these few lines will find you all the same. I am  
not at home at present but I will be glad to hear from you when  
you are next in the city. I am, Sir, very respectfully,  
Yours, J. W. Smith

Perkins 1659.

## May Observations.

Sow barley on all light lands and bearing grounds, and likewise hemp and flax, and all manner of fine seeds and peaches, take Lambs from their dams, stir lams for wheat and rye, leave topping of trees, reach hops to climb, but cut off the superfluous branches, rise early, walk the fields, especially by running streams, sage and sweet butter is now an excellent breakfast, sage, and clarified whey, as also crusty grain ale, and woodenwood beer are wholesome drink to be drunk fasting.

## June Observations.

Sow beets, bring home French bred corn and gardenes, set calumny, cornations and gills badders, sow beets and radishes, sow peas of four dates after the full, for then they will not run to seed, make hay, carry sand, lime, marle and manure of what kinde for best besting your land, cut neither hedge nor tree, in this and the two next months, beware of great thirst, like this and light diet, moderate exercise, and chaste thoughts.

## July Observations.

Wake port hay and house it while its fair weather, pull hemp that is ripe, gather garden beets, get me one woodenwood, and gail to stow on your farmers, to bestow mokes and beets, fence your copes, use moderate diet, take heed of great thirst, for nothing brings the violence of pestilence quicker than excessive thirst, and he that beets, and cold taken suddenly upon them, take heed of it, bleed not but upon all violent occasions.

## August Observations.

Follow close your corn harvest, sow winter beets, sow the seed of the Moon, gather garden beets, sow beets and oats, gather your summer fruits, refrain from sleeping in the day time after meat, avoid cold and excess.

## September Observations.

In the beginning of this month and end of the former, gather hops when they are brown, the best of the being fair and so best on the ground, kill bees, make verduces, sow wheat and rye, sow peas and set all kind of flowers between the full and new moon, to that, remove trees every new moon from September till February, especially in the new of the Moon, the weather fair and warm, wind south or west, use physick moderately, for beets fruits too much, but of wheat, honey and excess of diet.

## October Observations.

Sow wheat and rye, the south the better, for fear of rain see worms and dirt, in the winter fruit, the weather dry, in the afternoon, and in the new of the Moon, cut colicard if you desire to have those of color, on this once in two years, refuse not any needful physick at the hands of the learned, and use all moderate sports to revive the vital Spirits.

## November Observations.

Wake malt, kill boys, reach gardenes with hanks, let cranberries stand, sow wheat and rye in a sowing hot land, gardenes, cut down timber for plow trees and other employments for husbandry, and withhold meat and drink with some exercise to preserve health.

## December Observations.

In this and the next month eat down winter, in the full quarter of the Moon uncover the roots of fruit trees: in beets and pease, cover all the best beets and beets from frosts and fogs with old rotten horse dung, lime well to your cattle, water and keep moist your meadows, let beets stand, and drink good wine and strong drink, keep the fire warm, clean the house warm and dry, eat all care from you, and believe that that is in want with the climate: I have here set the Observations which are said to be for the advantage, make good use of them, and God bless the Work.

The beginning, continuance, and ending of the Kings Reigns since the Conquest, with the time how long it is since, to this Year, 1659. Being fit for Scriveners, and such as are employed in Law causes.
